Monitoring and Evaluation Specialist
Indonesia Inclusive Livelihoods for Poor Rural Communities
in Eastern Indonesia Project

BACKGROUND

The Indonesia Inclusive Livelihoods for Poor Rural Communities in Eastern Indonesia Project aims to achieve the Project Development Objective through inclusive, community-driven livelihoods development planning, paired with strengthening local linkages to support community-led livelihoods initiatives. The Project defines livelihoods as a broad range of activities and assets people utilize to support themselves. In target villages, communities rely heavily on a limited set of livelihoods options focused on food and commodity production from natural resources. Improving livelihoods in these areas requires support to food production, access to and management of natural resources, and increases in social capital of the poorest.

In this project, The World Bank works with BaKTI (Eastern Indonesia Knowledge Exchange) as an implementing agency, and partnerships with village and district governments in Seram Bagian Timur district (Maluku Province) and Sumba Barat Daya district (NTT Province). The Project will design and implement a model for poorly connected and marginal areas that takes an inclusive, whole-of-community approach to strengthening village economies and food systems.

The Project will (i) support villages to develop livelihoods plans and directly support community groups and the poorest households, and (ii) strengthen institutional linkages between community groups and village government, district government and other local actors, to provide sustained, local support to livelihoods initiatives and sustainable landscape management practices, including through the village funds.

PURPOSE

To support the project implementation, this project needs **Monitoring and Evaluation Specialist** to prepare and manage the monitoring and evaluation aspect of the project.

Monitoring and Evaluation Specialist will assist the Program Coordinator to navigate the implementation of the project according to the design of the project, in order to achieve the expected output, outcome, and goal of the project.

DUTIES AND RESPONSIBILITIES

1. Designing the Monitoring and Evaluation System for the program (including the M&E framework, Management Information System for data collection plan, data collection tools, data compilation system, and data presentation)
2. Supervising and ensuring the M&E System can be operated effectively
3. Leading the process of baseline and end line survey
4. Supervising the works of Data/MIS Officer

5. Providing training/coaching to team members for implementing the M&E system and using its tools
